

AGRICULTURE'S LEADER IN WATER QUALITY

SOLUACID™

Water Acidifier for Swine and Poultry.

For use in livestock raising facilities only, not for human consumption.

DESCRIPTION: To be used to lower or alter the Hydrogen Ion concentration (pH) of water.

DIRECTIONS:

Please calibrate your pH testing equipment regularly to ensure that the desired water pH is being achieved.

SoluAcid Acceptable Range: 0.60pH to 0.90pH

Never mix any other products in the same stock solution pail as the SoluAcid because they'll be denatured due to the low pH of the stock solution.

Please use the chart below to accurately use SoluAcid.

Final pH of water	mls/18.92L (mls/5 gal) of Stock Solution
7.5	31
7.0	126
6.5	390
6.0	750
5.5	1037
5.0	1175
4.5	1300

* if current pH is at 7.7-7.9

5ml of SoluAcid should be added to 123ml of water totalling 128ml.

That equates to 185ml (6.5 imperial fluid ounces) in one imperial gallon (4546ml/4.54l).

This equates to a 4% stock solution.

This solution can then be used with a medicator set to 1:128 and injected into the water line to reduce the pH of the water supply.

Please consult with our company's representative to obtain the best results.

Contains liquid acidic inorganic n.o.s.

CONTAINS PHOSPHORIC ACID

SOLUACID

DANGER
CORROSIVE
CAUSES BURNS
EYE IRRITANT
LUNG IRRITANT
SKIN IRRITANT

Keep container in well ventilated place. Do not empty into drains.

Wear protective clothing and a face shield.

FIRST AID:
Eyes: Wash with warm water. Seek immediate medical attention.

Do not ingest.

ANGEREUSEMENT
CORROSIVE
PROVOQUE DES BRÛLURES
IRRITANT POUR LES YEUX
IRRITANT POUR LES POUMONS
IRRITANT POUR LES PEAU

Tenir le recipient dans un endroit bien aéré. Ne pas jeter les résidus à l'égout.

Porter des vêtements protecteurs et une visière de protection.

PREMIERS SOINS : Obtenir des soins médicaux immédiats.

Ne pas ingérer.
