

COPPER CHLORIDE

This product is intended solely for the purpose of meeting the nutritional copper requirements of livestock.

GUARANTEED ANALYSIS:

Copper (Cu) minimum 58%
Chloride (Cl) maximum 16.25%

PHYSICAL DESCRIPTION:

Copper Chloride Hydroxide is a green, granular powder. >95% 60 Mesh Particle Size. Molecular Weight of 213.57.

DIRECTIONS FOR USE:

For use by feed manufacturers only. For best results it is recommended that a nutrition professional be consulted to determine an optimized feeding level.

Premix: Add at a rate of 1.73 kg/tonne of premix to obtain a copper concentration of 1,000 mg/kg in the final premix. To obtain a copper concentration of 500 mg/kg in the final premix, add at 0.865 kg/tonne of premix.

Supplement: Add at the rate of 0.173 kg/tonne of supplement to obtain a copper concentration of 100 mg/kg in the supplement. To obtain a copper concentration of 50 mg/kg in the supplement, add at a level of 0.087 kg/tonne. for the amount of milk replacer solution to be mixed up and fed per feeding.

STORAGE:

Product should be stored in a clean, cool and dry environment. It is advised that a system of "first in/first out" be followed to ensure optimized product quality.

CAUTION:

1. As is the case with any trace mineral ingredient, excessive levels of Copper Chloride Hydroxide can be toxic.
2. Do not feed to sheep or related species. Do not eat, drink or smoke when using this product.
3. Wash hands thoroughly after handling.
4. Dispose of containers in accordance with local/regional/national/international regulations.

WARNING:

Harmful if swallowed. Call a poison centre or doctor if you feel unwell. If swallowed rinse mouth.
